GAINEY ADVANCES DRILLING PROGRAM AT LAS MARGARITAS

Vancouver, BC - Gainey Capital Corp. (TSXV: GNC) (OTC: GNYPF) (“Gainey” or the “Company”) is pleased to announce the advancement of their upcoming drilling program at the Las Margaritas gold project in Durango, Mexico. As previously announced on April 10, 2019, Gainey has been approved by the Mexican Environmental Agency (SEMARNAT) to drill up to 32 drill targets on the property. In this initial phase, Gainey will drill at least 16 drill targets in approximately 2190 meters ([see map link](#)).

This drill program has been designed by Gainey’s highly experienced exploration team to focus on the best mineralization exposed on surface, where assays have returned up to 73.7 g/t gold (see Gainey news release dated March 19, 2019). Gold mineralization at Las Margaritas is typical of a low sulphidation epithermal system, as is common throughout this prolific geologic belt known as the Sierra Madre Occidental.

David Coburn, Gainey CEO, stated “We are excited about the high gold grades obtained in our surface sampling program and the fact that Las Margaritas has never been drilled. Our exploration team has been optimizing our drill program to test the down-dip and strike continuity of the mineralization and we are now ready to move forward. Discussions with drilling contractors are underway and mobilization of equipment is expected to begin in the coming weeks.”

David Dupre, P.Geo. is the designated Qualified Person for the El Colomo Project, as defined by National Instrument 43-101, and has approved this news release.
