Just to provide some information in advance to our shareholders, and to feed their eagerness to learn our current financial position we will hereby mention some of the most relevant aspects regarding:

#### Note 11 – Subsequent Events

**Operations.** Within 2015, 2016, 2017, 2018 and 2019, the company was engaged in exploring for industrial minerals. The company successfully managed to target several claims on different states of different industrial minerals. During this period, the price of Gold and Silver was not favorable and raising capital was not feasible. 2018 it improved but still it is not like it is now, the market has improved. 2019 has been better for us with respect to volume and we have been successfully gathering the attention of the market.

The company did invest a small amount of about \$30,000 USD on these exploration and development efforts during this period maintaining our Exploration Activities on acquisition mode and not allowing the company to fall into a category and be deemed a Shell Status.

**Shareholder Structure.** Several of our most important investors and shareholders have requested that before we go current, we advance critical information contained within the Financial Statements within Note 12.
