TOCVAN ANNOUNCES APPOINTMENT OF DARIN WAGNER AS SPECIAL ADVISOR

Hermosillo, Mexico – March 11, 2026 – Tocvan Ventures Corp. (the “Company” or “Tocvan”) (CSE: TOC) (OTCQB: TCVNF) (WKN: TV3/ A2PE64) a dynamic exploration and development company advancing high-potential gold and silver projects in Sonora, Mexico, is pleased to announce the appointment of Darin Wagner, P.Geo., as Special Advisor to the Company.

Mr. Wagner brings over 35 years of experience in mineral exploration and corporate development, with a proven track record of building and leading successful exploration companies. He is a recognized expert in gold systems, including those in mesothermal, epithermal, and porphyry environments. Notably, Mr. Wagner co-founded and led West Timmins Mining, which was acquired for \$424 million, and Balmoral Resources, acquired for \$140 million. He has also held advisory roles with prominent companies such as MAG Silver and Midnight Sun Mining, contributing to significant discoveries and value creation in the mining sector.

In his role as Special Advisor, Mr. Wagner will provide strategic guidance on exploration strategies, project development, and corporate initiatives as Tocvan advances its flagship Gran Pilar Gold-Silver Project toward near-term production. His expertise aligns perfectly with the Company’s focus on epithermal gold-silver systems in the mining-friendly jurisdiction of Sonora, Mexico.

“We are thrilled to welcome Darin to the Tocvan team,” said Brodie Sutherland, CEO of Tocvan. “His exceptional track record in discovering and advancing gold/precious metal deposits in multiple jurisdictions, combined with his experience in corporate growth and M&A will be invaluable as we accelerate our path to production at Gran Pilar. His insights will help us unlock the full potential of our projects and deliver substantial value to our shareholders.”

Mr. Wagner commented, “I am excited to join Tocvan as Special Advisor at this pivotal stage in the Company’s growth. The Gran Pilar Project represents a compelling opportunity in one of Mexico’s premier mining districts. There has literally never been a better time to become a gold producer, even at a modest scale, than today. I look forward to working with the team to advance their exploration and development efforts.”

This appointment further strengthens Tocvan’s technical and strategic advisory capabilities as the Company continues to position itself as a leading precious metals explorer in Mexico.

Quality Assurance / Quality Control

Rock and Drill samples were shipped for sample preparation to ALS Limited in Hermosillo, Sonora, Mexico and for analysis at the ALS laboratory in North Vancouver. The ALS Hermosillo and North Vancouver facilities are ISO 9001 and ISO/IEC 17025 certified. Gold was analyzed using 50-gram nominal weight fire assay with atomic absorption spectroscopy finish. Over limits for gold (>10 g/t), were analyzed using fire assay with a gravimetric finish. Silver and other elements were analyzed using a four-acid digestion with an ICP finish. Over limit analyses for silver (>100 g/t) were re-assayed using an ore-grade four-acid digestion with ICP-AES finish. Control samples comprising certified reference samples and blank samples were systematically inserted into the sample stream and analyzed as part of the Company's robust quality assurance / quality control protocol.
