NEWS RELEASE

Coeur Reports Third Quarter 2026 Results

Newly-acquired Canadian operations drive 77% year-over-year revenue growth; cash balance increases to $1.2 billion after returning nearly 50% of quarterly free cash flow to stockholders; Company remains on track for record full-year results

Chicago, Illinois - November 4, 2026 - Coeur Mining, Inc. ("Coeur" or the "Company") (NYSE, TSX: CDE) today reported third quarter 2026 financial results, including revenue of $1.0 billion and cash flow from operating activities of $386 million. The Company reported quarterly GAAP net income of $109 million, or $0.11 per share. On an adjusted basis[1], Coeur reported quarterly adjusted EBITDA[1] of $448 million, cash flow from operating activities before changes in working capital of $409 million and net income of $98 million, or $0.10 per share. Adjusted EBITDA[1] and net income were reduced by $40 million, or $(0.03) per share, of non-cash expense due to purchase price allocation accounting for Rainy River's stockpile inventory.

Key Highlights

- **Solid financial performance** – On a year-over-year basis, revenue increased 77% to $1.0 billion, adjusted EBITDA[1] increased 69% to $448 million, and free cash flow[1] increased 27% to $240 million. Third quarter average realized gold and silver prices per ounce declined to $3,979 and $62.22, respectively, compared to $4,140 and $71.18 in the prior period. Silver contributed 27% of the Company's revenue in the quarter
- **Steady production and strong cost performance across balanced portfolio** – Quarterly gold production totaled 161,400 ounces, with sequential quarterly production growth at Rochester and Wharf of 39% and 28%, respectively. Quarterly silver production of 4.2 million ounces decreased 12% year over year, primarily driven by lower silver grades at Palmarejo. Adjusted CAS[1] per gold and silver ounce declined 16% and 1% quarter over quarter, respectively
- **Growing balance sheet strength and consistent capital returns** – Coeur's cash balance increased more than fourfold versus the prior year to $1.2 billion, driven by strong free cash flow at each of the Company's seven North American operations. Since the commencement of the enhanced $750 million share repurchase program in mid-May, Coeur has repurchased $231 million of common stock[2], or 12.6 million shares, including $111 million in the third quarter, representing approximately 46% of quarterly free cash flow. The Company today declared a second dividend of $0.02 per share, which is expected to be paid on December 16, 2026 to all stockholders of record as at the close of business on November 30, 2026
- **Company continuing to target full-year production at the low-end of guidance ranges** – Coeur continues to target achieving record full-year production of approximately 630,000 ounces of gold, 18.7 million ounces of silver, and 40.0 million pounds of copper, which represent the low end of the Company's guidance ranges

“The Company continued generating strong financial and operational results from its recently expanded portfolio of seven North American operations despite lower prices and several short-term operational challenges encountered during the quarter. However, we remain on-track to deliver strong fourth quarter results to cap off a transformative and record year for the Company.” said Mitchell J. Krebs, Chairman, President and Chief Executive Officer.

“Wharf delivered another strong quarter, Las Chispas achieved another steady quarter of performance, and Rochester’s crusher set new records for tonnes crushed in the period. Solid progress was achieved with the ongoing ramp-ups at both New Afton and Rainy River despite unexpected conveyor downtime at New Afton during the quarter and heavy rains that impacted open pit operations at Rainy River. Heavy seasonal rains at Palmarejo also contributed to lower than anticipated production.

“As we look ahead to year-end, we expect strong fourth quarter results to drive record full-year 2026 production and financial performance, including record adjusted EBITDA of over $2 billion and free cash flow exceeding $1.3 billion at current prices. With a bolstered liquidity position and a full year of contributions from our new Canadian operations next year, we are well-positioned to deliver even stronger operational and financial results in 2027.”

Financial and Operating Highlights (Unaudited)

(Amounts in millions, except per share amounts, gold ounces produced and sold, and per-ounce/pound metrics)	3Q 2026	2Q 2026	1Q 2026	4Q 2025	3Q 2025

Financial Results

Third quarter 2026 revenue totaled $1.0 billion compared to $1.1 billion in the prior period and $555 million in the third quarter of 2025. The Company produced 161,400 ounces of gold, 4.2 million ounces of silver, and 10.0 million pounds of copper during the quarter. Metal sales for the quarter totaled 164,311 ounces of gold, 4.3 million ounces of silver and 9.3 million pounds of copper. Average realized prices for the quarter were $3,979 per ounce of gold, $62.22 per ounce of silver and $6.65 per pound of copper compared to $4,140 per ounce of gold, $71.18 per ounce of silver and $6.11 per pound of copper in the prior period and $3,148 and $38.93 per ounce of gold and silver, respectively, in the third quarter of 2025.

Gold, silver and copper sales represented 66%, 27% and 6% of quarterly revenue, respectively. The Company's U.S., Canadian and Mexican operations accounted for approximately 34%, 36% and 30% of third-quarter revenue, respectively.

Adjusted costs applicable to sales per ounce[1] of gold and silver declined to $2,054 and $22.73, respectively, compared to $2,442 and $22.99, respectively, in the prior period. Adjusted CAS[1] per gold ounce in the third quarter includes $40 million of non-cash expense related to purchase price allocation ascribed to inventory, which added $245 per ounce to the gold CAS[1]. General and administrative expenses decreased 5% quarter over quarter to $22 million.

Coeur invested approximately $50 million ($43 million expensed and $7 million capitalized) in exploration during the quarter compared to approximately $44 million ($34 million expensed and $10 million capitalized) in the prior period. See the "Operations" and "Exploration" sections for additional detail on the Company's exploration activities.

The Company recorded income tax expense of approximately $65 million during the third quarter. Cash income and mining taxes paid during the period totaled approximately $51 million, primarily reflecting income and mining tax payments in Mexico.

Quarterly operating cash flow decreased to $386 million from $513 million in the prior period, primarily reflecting lower realized gold and silver prices and lower metal sales, particularly at New Afton, Rainy River, and Palmarejo. Operating cash flow was also affected by $50 million of working capital adjustment outflows related to timing of interest expense and annual insurance premiums.

Third quarter capital expenditures were $145 million compared to $126 million in the prior period. Sustaining and development capital expenditures accounted for approximately $122 million and $23 million, or 84% and 16%, respectively, of Coeur's total capital investment during the quarter.

Operations

Total capital expenditures	$ 14.8	$ 11.8	$ —	$ —	$ —
Free cash flow[1]	$ 46.9	$ 50.6	$ 24.6	$ —	$ —

Operational

- Gold and copper production in the third quarter totaled 12,189 ounces and 10.0 million pounds, respectively, compared to 14,059 gold ounces and 11.4 million pounds in the prior period
- Production was impacted by lower-than-planned mining and milling rates as a result of a conveyor belt failure which occurred in late August and was subsequently repaired by mid-September. Since then, underground mining rates of 16,000 tonnes per day have been achieved and sustained
- Lower tonnes milled in the quarter were partially offset by higher grades and improved recoveries in the period

Financial

- Copper and gold accounted for approximately 56% and 44% of revenue during the quarter, respectively
- Third quarter adjusted CAS[1] for copper and gold on a by-product basis totaled $2.67 and $1,673 per pound and ounce, respectively
- Free cash flow[1] in the third quarter totaled $47 million compared to $51 million in the prior period

Exploration

- Key exploration goals for 2026 include infill drilling of inferred resources in the K-Zone resource cave shape and expansion of the overall measured, indicated and inferred resources in the K-Zone

- Exploration investment in the third quarter totaled approximately $7 million (substantially all expensed), compared to $5 million (substantially all expensed) in the prior period, and primarily focused on expanding the K-Zone to the southeast and west
- Successful results have been received in both directions, with the footprint of the K-Zone extended by more than 300 meters this year. Additional underground development is underway to allow for drill testing of a further 450 meters of strike length to the east

Guidance

- Prorated production reflecting nine months of contributions is expected to be 50,000 - 60,000 ounces of gold, 40 - 50 million pounds of copper, and 100,000 - 180,000 ounces of silver
- Prorated adjusted CAS[1] reflecting nine months of results are expected to be $1,300 - $1,600 per gold ounce and $2.00 - $2.30 per pound of copper, which includes non-cash expense of $175 per ounce of gold and $0.24 per pound of copper relating to purchase price allocation ascribed to short-term inventory
- Prorated capital expenditures reflecting nine months of ownership are expected to be $51 - $61 million, reflecting investments related to the ramp-up of C-Zone
- Prorated exploration investment reflecting nine months of activity is expected to be $19 - $23 million ($17 - $19 million expensed and $2 - $4 million capitalized)

Rainy River, Canada

(Dollars in millions, except per ounce amounts)	3Q 2026	2Q 2026	1Q 2026[5]	4Q 2025	3Q 2025

Development capital expenditures	$ 13.4	$ 14.5	$ —	$ —	$ —
Total capital expenditures	$ 61.5	$ 57.1	$ 6.4	$ —	$ —
Free cash flow[1]	$ 36.1	$ 123.1	$ 83.6	$ —	$ —

Operational

- Gold production in the third quarter totaled 53,965 ounces compared to 64,042 gold ounces in the prior period, due primarily to lower grades and additional planned maintenance days in the period
- Phase 4 open pit production was impacted by unusually heavy rainfall in the quarter, which resulted in the increased processing of lower-grade stockpile ore, partially offset by stronger than planned performance from the Phase 5 open pit

- Underground mining continues to ramp-up, with rates averaging approximately 3,400 tonnes per day in the quarter compared to 2,300 tonnes per day in the previous period. Target of 5,000 tonnes per day achieved in quarter with additional mining horizons being developed in the first half of 2027 to help sustain those levels

Financial

- Third quarter adjusted CAS[1] for gold on a by-product basis totaled $2,883 per ounce. CAS[1] per gold ounce includes non-cash expense of $40 million of purchase price allocation ascribed to inventory, which added $694 per ounce to the gold CAS[1]
- Free cash flow[1] in the third quarter totaled $36 million compared to $123 million in the prior period

Exploration

- Exploration in 2026 is focused on the extension of known shoots down-plunge and laterally, assessment of near-mine opportunities for additional open pit resources and early-stage exploration of new targets to further build the resource pipeline
- Exploration investment in the third quarter totaled approximately $5 million (substantially all expensed), consistent with the prior period
- Underground drilling was focused on extending and infill drilling higher-grade shoots and testing gaps between existing shoots, while regional exploration programs ended during the quarter

Guidance

- Prorated production reflecting nine months of contributions is expected to be 190,000 - 230,000 ounces of gold and 380,000 - 450,000 ounces of silver
- Prorated adjusted CAS[1] reflecting nine months of results are expected to be $2,700 - $3,000 per gold ounce, and includes $1,020 per ounce of non-cash expense relating to the purchase price allocation ascribed to short-term inventory and $155 per ounce attributable to the Royal Gold stream
- Prorated capital expenditures reflecting nine months of ownership are expected to be $150 - $170 million, reflecting investments in underground mine development and infrastructure, as well as the tailings management area perimeter dam raise
- Prorated exploration investment reflecting nine months of activity is expected to be $8 - $10 million (substantially all expensed)

Free cash flow[1,9]	$ 72.6	$ 107.2	$ 76.2	$ 78.5	$ 66.1

Operational

- Third quarter silver and gold production totaled 1.5 million and 15,942 ounces, respectively, compared to 1.5 million and 15,518 ounces, respectively, in the prior period and 1.6 million and 16,540 ounces, respectively, in the third quarter of 2025
- Production during the quarter was driven by increased mill throughput and higher gold grades, partially offset by lower silver grades

Financial

- Silver and gold accounted for approximately 58% and 42% of revenue during the quarter, respectively
- Third quarter adjusted CAS[1] for silver and gold on a co-product basis totaled $14.26 and $977 per ounce, respectively
- Free cash flow[1] in the third quarter totaled $73 million compared to $107 million in the prior period, primarily reflecting fewer gold and silver ounces sold and lower average realized prices

Exploration

- Key exploration goals in 2026 include the continuation of expansion and infill drilling on veins in the Babicanora Block, Las Chispas Block and the Gap Zone and the commencement of scout drilling aimed at identifying new vein targets and replenishing inferred inventory for future conversion
- Exploration investment in the third quarter totaled approximately $7 million ($3 million expensed and $4 million capitalized), consistent with the prior period
- A key focus during the quarter was expansion and infill drilling in the Gap Zone, where the potential exists for significant resource growth

Guidance

- Full-year 2026 production is expected to be 55,000 - 65,000 ounces of gold and 5.5 - 6.3 million ounces of silver
- Adjusted CAS[1] in 2026 are expected to be $750 - $950 per gold ounce and $12.50 - $14.50 per silver ounce
- Capital expenditures in 2026 are expected to be $71 - $84 million, consisting primarily of sustaining capital and underground development
- Exploration investment in 2026 is expected to be $21 - $26 million ($11 - $14 million expensed and $10 - $12 million capitalized)

Development capital expenditures	$ 2.6	$ 1.7	$ 1.7	$ 3.1	$ 1.4
Total capital expenditures	$ 8.2	$ 7.1	$ 8.5	$ 8.3	$ 5.7
Free cash flow[1]	$ 33.8	$ 55.6	$ 64.3	$ 62.5	$ 46.9

Operational

- Third quarter silver and gold production totaled 1.3 million and 18,469 ounces, respectively, compared to 1.5 million and 18,602 ounces, respectively, in the prior period and 1.5 million and 24,802 ounces, respectively, in the third quarter of 2025
- Heavy rain in the quarter disrupted delivery of critical construction materials which impacted backfill capacity and affected planned mining in higher-grade areas. Lower grades in the quarter were partially offset by higher tonnes milled

Financial

- Silver and gold accounted for approximately 64% and 36% of revenue during the quarter, respectively
- Third quarter adjusted CAS[1] for silver and gold on a co-product basis totaled $28.71 and $1,174 per ounce, respectively
- Capital expenditures increased to $8 million compared to $7 million in the prior period
- Free cash flow[1] in the third quarter totaled $34 million compared to $56 million in the prior period

Exploration

- Exploration in 2026 is focused on adding reserves and resources in proximity to mine infrastructure while developing a significant pipeline to the east in the area unaffected by the Franco-Nevada gold stream, where over 70% of the 2026 exploration budget is expected to be spent
- Exploration investment in the third quarter totaled approximately $10 million ($9 million expensed and $1 million capitalized) compared to $8 million ($7 million expensed and $1 million capitalized) in the prior period
- A significant focus of drilling was on both the mine corridor and in the Eastern District, with twelve targets drilled, the majority of which extend along strike and/or down-dip

Other

- 9,002 ounces, or approximately 48% of Palmarejo's gold sales in the third quarter, were sold under the gold stream agreement with Franco-Nevada at a price of $800 per ounce. Approximately 40% - 50% of Palmarejo's 2026 gold sales are expected to be sold under the gold stream agreement

Guidance

- Full-year 2026 production is expected to be 95,000 - 105,000 ounces of gold and 6.25 - 7.0 million ounces of silver
- Adjusted CAS[1] in 2026 are expected to be $700 - $900 per gold ounce and $21.50 - $23.50 per silver ounce
- Capital expenditures in 2026 are expected to be $35 - $41 million, consisting primarily of sustaining capital and underground development
- Exploration investment in 2026 is expected to be $24 - $28 million ($22 - $24 million expensed and $2 - $4 million capitalized)

Free cash flow[1]	$ 35.1	$ 25.2	$ 61.9	$ 77.8	$ 29.6

Operational

- Silver and gold production in the third quarter totaled 1.2 million and 16,211 ounces, respectively, compared to 1.2 million and 11,671 ounces, respectively, in the prior period and 1.6 million and 14,801 ounces, respectively, in the third quarter of 2025
- Gold production increased 39% quarter over quarter, driven primarily by the placement of higher-grade ore from the newly commissioned Phase 2A leach pad. Silver production increased due to slightly higher grades and increased ore placement compared to the prior period. Silver production was lower than expected due to blending of ore to manage sulfide levels and slower than expected recovery rates on newly placed ore
- Ore tonnes placed through the crushing circuit reached a quarterly record of 6.8 million tonnes (7.5 million imperial tons). Total tonnes placed during the quarter were 8.2 million tonnes (9.0 million imperial tons)

Financial

- Silver and gold accounted for approximately 54% and 46% of revenue during the quarter, respectively
- Third quarter adjusted CAS[1] for silver and gold on a co-product basis totaled $26.48 and $1,762 per ounce, respectively
- Capital expenditures increased to $22 million compared to $18 million in the prior period
- Free cash flow[1] totaled $35 million compared to $25 million in the prior period, primarily driven by higher production and offset by lower average realized metals prices

Exploration

- Exploration in 2026 is focused on near-pit drilling to support upcoming permitting and the commencement of district-scale exploration to build the resource pipeline

- Exploration investment in the third quarter totaled approximately $3 million ($2 million expensed and $1 million capitalized) compared to $2 million ($1 million expensed and $1 million capitalized) in the prior period
- Drill programs focused on infill drilling at the Wedge target in East Rochester, extension of the Northeast Rochester target and early-stage work over a large portion of the tenement package ahead of planned scout drilling in 2027

Guidance

- Full-year 2026 production is expected to be 6.4 - 7.8 million ounces of silver and 70,000 - 90,000 ounces of gold
- Adjusted CAS[1] in 2026 are expected to be $23.00 - $25.00 per silver ounce and $1,350 - $1,550 per gold ounce
- Capital expenditures in 2026 are expected to be $96 - $110 million, which includes projects related to the Phase 2 development of the Stage 6 leach pad and modifications after startup of the crusher corridor
- Exploration investment in 2026 is expected to be $14 - $17 million ($7 - $9 million expensed and $7 - $8 million capitalized)

Free cash flow[1]	$ 25.6	$ 32.3	$ 44.2	$ 50.8	$ 30.8

Operational

- Gold production in the third quarter totaled 21,483 ounces compared to 21,528 ounces in the prior period and 27,231 ounces in the third quarter of 2025
- Production was consistent quarter over quarter, reflecting comparable mill throughput and grades

Financial

- Third quarter adjusted CAS[1] decreased 1% quarter over quarter to $2,304 per ounce
- Capital expenditures remained flat quarter over quarter at $12 million

- Free cash flow[1] in the third quarter totaled $26 million compared to $32 million in the prior period

Exploration

- Exploration in 2026 is focused on maintaining a five-year reserves-based life of mine and bolstering the inferred resource pipeline
- Exploration investment in the third quarter totaled approximately $4 million ($3 million expensed and $1 million capitalized), consistent with the prior period
- Expansion and infill drilling were focused mainly on two key zones within Kensington, with expansion drilling undertaken on Raven and Elmira Hanging wall targets

Guidance

- Full-year 2026 production is expected to be 98,000 - 110,000 gold ounces
- Adjusted CAS[1] in 2026 are expected to be $1,750 - $1,950 per gold ounce
- Capital expenditures in 2026 are expected to be $54 - $63 million, which includes investment related to raising the main tailings storage facility embankment, which is expected to be completed this year, and underground mine development
- Exploration investment in 2026 is expected to be $14 - $15 million ($8 - $9 million expensed and $6 - $6 million capitalized)

Wharf, United States

(Dollars in millions, except per ounce amounts)	3Q 2026	2Q 2026	1Q 2026	4Q 2025	3Q 2025

Exploration expense	$ 0.6	$ 1.8	$ 3.2	$ 0.6	$ 0.7
Cash flow from operating activities	$ 54.8	$ 33.8	$ 15.3	$ 65.9	$ 57.2
Sustaining capital expenditures (excludes capital lease payments)	$ 2.1	$ (6.0)	$ 10.0	$ 2.9	$ 1.2
Development capital expenditures	$ 1.6	$ 4.1	$ 3.1	$ 0.7	$ 2.0
Total capital expenditures	$ 3.7	$ (1.9)	$ 13.1	$ 3.6	$ 3.2
Free cash flow[1]	$ 51.1	$ 35.7	$ 2.2	$ 62.3	$ 54.0

Operational

- Gold production in the third quarter increased 28% quarter over quarter to 23,141 ounces compared to 18,070 ounces in the prior period and 27,990 ounces in the third quarter of 2025
- Higher production in the quarter was primarily driven by metal recovery from higher ore tonnes placed in the prior period
- Ore tonnes placed decreased quarter over quarter due to lower crusher availability associated with the completion of crusher circuit ramp-up and grid power disruptions

Financial

- Adjusted CAS[1] on a by-product basis increased 25% quarter over quarter to $1,580 per ounce
- Capital expenditures totaled approximately $4 million compared to $(2) million in the prior period, which reflected payment of $10 million of property damage insurance proceeds received in the period and recorded as a reduction of capital expenditures
- Free cash flow[1] in the third quarter totaled $51 million compared to $36 million in the prior period

Exploration

- In 2026, exploration programs at Juno and North Foley are expected to build on the 2025 expansion and infill drilling, with the aim of adding to both reserves and resources at year-end. The Summit Flat target is also expected to undergo expansion and infill drilling, while scout drilling is expected to commence and focus on the continued development of the inferred resource pipeline
- Exploration investment during the third quarter totaled $1 million (substantially all expensed) compared to $5 million ($2 million expensed and $3 million capitalized) in the prior period
- The first phase of 2026 drilling was completed in the second quarter, with the third quarter focused on analysis and integration of results and geological modelling. The second phase of the 2026 drill programs commenced in the fourth quarter

Guidance

- Full-year 2026 production is expected to be 72,000 - 90,000 ounces of gold and 50,000 - 200,000 ounces of silver
- Adjusted CAS[1] in 2026 are expected to be $1,400 - $1,600 per gold ounce
- Capital expenditures in 2026 are expected to be $17 - $23 million, net of insurance proceeds, which reflects remediation of the existing crusher and planned infrastructure upgrades
- Exploration investment in 2026 is expected to be $10 - $12 million ($8 - $9 million expensed and $2 - $3 million capitalized)

Other

- In October, Coeur reached an agreement to settle an insurance claim related to the November 2025 fire at Wharf that damaged portions of the crusher assembly. Cash proceeds of $70 million are expected to be received in the fourth quarter of 2026

Exploration

During the third quarter, Coeur invested approximately $50 million ($43 million expensed and $7 million capitalized) compared to roughly $44 million ($34 million expensed and $10 million capitalized) in the prior period and focused on a mix of near-mine expansion and infill programs with multiple sites also commencing significant summer programs that involve early-stage exploration and scout drilling.

The Company's exploration investment in 2026 is expected to total $118 - $132 million for expansion drilling (classified as exploration expense) and $29 - $37 million for infill drilling (capitalized exploration) for a total expected investment of $147 - $169 million.

Top exploration priorities for 2026 remain: (i) continuing to extend and infill known deposits to support future life of mine, and building the inferred pipeline at Las Chispas, in addition to restarting regional exploration; (ii) infill drilling at Hidalgo and Independencia Sur to support near-term life of mine additions at Palmarejo, also building the inferred pipeline to provide optionality to the operation, with particular emphasis on the Eastern District outside the Franco-Nevada gold stream boundary; (iii) completing drilling to support the next stage of mine permit expansion at Rochester, along with regional studies and scout drilling across the district to build the exploration pipeline; (iv) maintaining a five-year reserve-based mine life at Kensington and increasing focus on scout drilling to add inferred resources; (v) continuing the expansion and infill programs at Wharf to further add to the life of mine and conduct district-scale work to support long-term mine life additions; (vi) drilling programs to support the study program and continue expanding the resource base at Silvertip through a combination of scout, expansion and infill drilling; (vii) infill and expansion drilling at the K-Zone at New Afton; and (viii) expansion drilling of underground shoots at Rainy River, testing of additional open-pit opportunities and commencing more aggressive regional exploration.

2026 Guidance

The Company expects full-year 2026 metal production at the low end of the respective guidance ranges for gold, silver and copper. As a result, CAS[1] are expected to be at the upper end of respective full-year 2026 ranges.

Capital expenditures, amortization, exploration, general and administrative expenses ("G&A"), and cash income and mining taxes are trending toward the low end of guidance ranges.

2026 Production Guidance

	Gold (oz)	Silver (K oz)	Copper (M lbs)
New Afton	50,000 - 60,000	100 - 180	40 - 50
Rainy River	190,000 - 230,000	380 - 450	-
Las Chispas	55,000 - 65,000	5,500 - 6,300	-
Palmarejo	95,000 - 105,000	6,250 - 7,000	-
Rochester	70,000 - 90,000	6,400 - 7,800	-
Kensington	98,000 - 110,000	-	-
Wharf	72,000 - 90,000	50 - 200	-
Total	630,000 - 750,000	18,680 - 21,930	40 - 50

2026 Adjusted Costs Applicable to Sales Guidance

	Gold ($/oz)	Silver ($/oz)	Copper ($/lb)
New Afton (co-product)[10]	$1,300 - $1,600	-	$2.00 - $2.30
Rainy River (by-product)[11]	$2,700 - $3,000	-	-
Las Chispas (co-product)	$750 - $950	$12.50 - $14.50	-
Palmarejo (co-product)	$700 - $900	$21.50 - $23.50	-
Rochester (co-product)	$1,350 - $1,550	$23.00 - $25.00	-
Kensington	$1,750 - $1,950	-	-
Wharf (by-product)	$1,400 - $1,600	-	-

2026 Capital, Amortization, Exploration, G&A and Income and Mining Tax Guidance

	($M)
Capital Expenditures, Sustaining	$360 - $405
Capital Expenditures, Development	$160 - $200
Exploration, Expensed	$118 - $132
Exploration, Capitalized	$29 - $37
General & Administrative Expenses	$90 - $100
Cash Income and Mining Taxes	$350 - $450
Amortization	$1,100 - $1,200
Effective Tax Rate (%)	34% - 38%

The Company's guidance figures assume estimated prices of $4,000/oz gold, $55.00/oz silver, and $6.25/lb copper, as well as CAD of 1.38 and MXN of 18.00. Guidance figures exclude the impact of any metal sales or foreign exchange hedges.

The normalized effective tax rate excludes items that are not reflective of Coeur's underlying performance, such as the impacts of foreign currency on deferred taxes, taxes related to prior periods, and one-time, non-cash, tax valuation allowance adjustments.

Financial Results and Conference Call

Coeur will host a conference call to discuss its third quarter 2026 financial results on November 5, 2026 at 11:00 a.m. Eastern Time.

Dial-In Numbers: (855) 560-2581 (U.S./Canada)

(412) 542-4166 (International)

Conference ID: Coeur Mining

Hosting the call will be Mitchell J. Krebs, Chairman, President and Chief Executive Officer of Coeur, who will be joined by Thomas S. Whelan, Executive Vice President and Chief Financial Officer, Michael "Mick" Routledge, Executive Vice President and Chief Operating Officer, and other members of management. A replay of the call will be available through November 12, 2026.

Replay numbers: (855) 669-9658 (U.S./Canada)

(412) 317-0088 (International)

Conference ID: 285 86 87

About Coeur

Coeur Mining, Inc. is a U.S.-based, well-diversified, growing precious metals producer with seven wholly-owned operations: the New Afton gold-copper mine in British Columbia, Canada, the Rainy River gold-silver mine in Ontario, Canada, the Las Chispas silver-gold mine in Sonora, Mexico, the Palmarejo gold-silver mine in Chihuahua, Mexico, the Rochester silver-gold mine in Nevada, the Kensington gold mine in Alaska and the Wharf gold mine in South Dakota. In addition, the Company wholly-owns the Silvertip polymetallic critical minerals exploration project in British Columbia, Canada.

Cautionary Statements

This news release contains forward-looking statements within the meaning of securities legislation in the United States and Canada, including statements regarding EBITDA, cash flow, production, costs, capital expenditures, tax rates and treatment, exploration and development efforts and plans and potential impacts on reserves and resources, mine lives and expected extensions, the Franco-Nevada gold stream agreement at Palmarejo, anticipated production, and costs and expenses and operations at New Afton, Rainy River, Las Chispas, Palmarejo, Rochester, Kensington and Wharf. Such forward-looking statements involve known and unknown risks, uncertainties and other factors which may cause Coeur's actual results, performance or achievements to be materially different from any future results, performance or achievements expressed or implied by the forward-looking statements. Such factors include, among others, the risk that anticipated production, cost and expense levels are not attained, the risks and hazards inherent in the mining business (including risks inherent in developing and expanding large-scale mining projects, environmental hazards, industrial accidents, weather or geologically-related conditions), changes in the market prices of gold, silver and copper, and a sustained lower price or higher treatment and refining charge environment, the uncertainties inherent in Coeur's production, exploration and development activities, including risks relating to permitting and regulatory delays (including the impact of government shutdowns) and mining law changes, ground conditions, grade and recovery variability, length of leach cycles for production of gold and silver ounces from ore placed on leach pads, any future labor disputes or work stoppages (involving the Company and its subsidiaries or third parties), the risk of adverse outcomes in litigation, the uncertainties inherent in the estimation of mineral reserves and resources, impacts from Coeur's future acquisition of new mining properties or businesses, risks associated with the integration of the New Afton and Rainy River mines following the acquisition of New Gold Inc., the loss of access or insolvency of any third-party refiner or smelter to whom Coeur markets its production, materials and equipment availability, inflationary pressures, changes in applicable tax laws or regulatory interpretations, impacts from tariffs or other trade barriers, continued access to financing sources, the effects of environmental and other governmental regulations and government shut-downs, the risks inherent in the ownership or operation of or investment in mining properties or businesses in foreign countries, the ability to maintain positive relationships with indigenous groups and other community stakeholders, Coeur's ability to raise additional financing necessary to conduct its business, make payments or refinance its debt, as well as other uncertainties and risk factors set out in filings made from time to time with the United States Securities and Exchange Commission, and the Canadian securities regulators, including, without limitation, Coeur's most recent reports on Form 10-K and Form 10-Q. Actual results, developments and

timetables could vary significantly from the estimates presented. Readers are cautioned not to put undue reliance on forward-looking statements. Coeur disclaims any intent or obligation to update publicly such forward-looking statements, whether as a result of new information, future events or otherwise. Additionally, Coeur undertakes no obligation to comment on analyses, expectations or statements made by third parties in respect of Coeur, its financial or operating results or its securities. This does not constitute an offer of any securities for sale.

The scientific and technical information concerning our mineral projects in this news release have been reviewed and approved by a "qualified person" under Item 1300 of SEC Regulation S-K, namely our Senior Vice President, Technical Services, Christopher Pascoe. For a description of the key assumptions, parameters and methods used to estimate mineral reserves and mineral resources, as well as data verification procedures and a general discussion of the extent to which the estimates may be affected by any known environmental, permitting, legal, title, taxation, sociopolitical, marketing or other relevant factors, please review the Technical Report Summaries for each of the Company's material properties which are available at www.sec.gov.

Non-U.S. GAAP Measures

We supplement the reporting of our financial information determined under United States generally accepted accounting principles ("U.S. GAAP") with certain non-U.S. GAAP financial measures, including EBITDA, adjusted EBITDA, adjusted EBITDA margin, free cash flow, adjusted net income (loss), operating cash flow before changes in working capital and adjusted costs applicable to sales per ounce. We believe that these adjusted measures provide meaningful information to assist management, investors and analysts in understanding our financial results and assessing our prospects for future performance. We believe these adjusted financial measures are important indicators of our recurring operations because they exclude items that may not be indicative of, or are unrelated to our core operating results, and provide a better baseline for analyzing trends in our underlying businesses. We believe EBITDA, adjusted EBITDA, adjusted EBITDA margin, free cash flow, adjusted net income (loss) and adjusted costs applicable to sales per ounce are important measures in assessing the Company's overall financial performance. For additional explanation regarding our use of non-U.S. GAAP financial measures, please refer to our Form 10-K for the year ended December 31, 2025.

Notes

1. EBITDA, adjusted EBITDA, adjusted EBITDA margin, free cash flow, adjusted net income (loss), operating cash flow before changes in working capital and adjusted costs applicable to sales per ounce (gold and silver) are non-GAAP measures. Please see tables in the Appendix for the reconciliation to U.S. GAAP. Free cash flow is defined as cash flow from operating activities less capital expenditures. Liquidity is defined as cash and cash equivalents plus availability under the Company's revolving credit facility ("RCF"). Future borrowing under the RCF may be subject to certain financial covenants. Please see tables in Appendix for the calculation of consolidated free cash flow and liquidity.
2. Approximate amount of shares repurchased from May 8, 2026 to October 30, 2026, including commissions.
3. Excludes amortization.
4. Includes capital leases. Net of debt issuance costs and premium received.
5. Reflects eleven days of production following the closing of the New Gold acquisition on March 20, 2026.
6. For the three months ended March 31, 2026, New Afton CAS per gold ounce and CAS per copper pound included the non-cash impact of the $21 million purchase price allocation ascribed to inventory, which increased CAS per gold ounce by $2,560 and CAS per copper pound by $3.10.
7. For the three months ended September 30, 2026, Rainy River CAS per gold ounce included the non-cash impact of the $40 million purchase price allocation ascribed to inventory, which increased gold CAS by $694 per ounce. For the three months ended June 30, 2026, Rainy River CAS per gold ounce included the non-cash impact of the $141 million purchase price allocation ascribed to inventory, which increased gold CAS by $2,036 per ounce. For the three months ended March 31, 2026, Rainy River CAS per gold ounce included the non-cash impact of the $65 million purchase price allocation ascribed to inventory, which increased gold CAS by $3,026 per ounce.
8. The amounts shown in this news release for costs applicable to sales ("CAS") per ounce for Las Chispas, adjusted EBITDA, and adjusted net income from continuing operations are presented on a different basis compared to the amounts reported in the news releases reporting results for the first, second, and third quarters of 2025 as a result of revisions to "Acquisition Accounting". Based on discussions with the SEC staff in the course of a regular review of Company disclosures, the staff has provided its view that, under its guidance on non-GAAP financial measures, the Company is required to calculate Las Chispas CAS, adjusted EBITDA and adjusted net income using the fair value of Las Chispas' legacy inventory held as of the Las Chispas acquisition closing date, February 14, 2025, except when calculating the net leverage ratio under the Company's RCF since the RCF contractually provides for certain adjustments to be made. As a result, except when calculating the net leverage ratio under the RCF, the Company is not making adjustments that were intended to calculate non-GAAP financial measures using SilverCrest Metals Inc.'s historical costs of producing legacy inventory as such inventory is sold. In our view, the historical cost remains more indicative of the costs Las Chispas incurred in producing this legacy inventory, and is a

better measure of performance, than the acquisition accounting measures of these costs. As a result of removing these adjustments, for the three months ended September 30, June 30, and March 31, 2025, adjusted EBITDA (including last-twelve-months ("LTM") adjusted EBITDA) and adjusted net income in this release are lower than previously reported, and Las Chispas CAS are higher, except as used in calculation of the net leverage ratio under the RCF, including the impact of the amortization of acquired inventory purchase price allocation of $3.3 million, $33.4 million, $29.7 million, and $27.0 million for the three months ended December 31, September 30, June 30, and March 31, 2025, respectively and an impact of $93.5 million for LTM. In each case, we are also providing separately the amount of the relevant impact of amortizing the non-cash, non-recurring step-up in cost basis for legacy inventory from the acquisition-related fair value accounting, so readers can supplementally assess such amounts to the extent they deem appropriate to understand the normal, recurring cost performance of Las Chispas as well as Company-wide adjusted EBITDA and adjusted net income. To calculate amounts comparable to first, second and third quarter disclosures, which is the methodology the Company's management uses to assess normal, recurring performance and our lenders use for purposes of calculating the net leverage ratio covenant under our RCF, readers would need to subtract the step-up in cost basis from Las Chispas CAS, and add back the impact of the step-up in cost basis to adjusted EBITDA and adjusted net income.

9. Includes $72 million of monetized finished goods following the SilverCrest acquisition on February 14, 2025.
10. New Afton CAS per gold ounce guidance includes the non-cash impact of the $20 million total of the preliminary purchase price allocation ascribed to inventory, split between gold ($175 per ounce) and copper ($0.24 per pound).
11. Rainy River CAS per gold ounce guidance includes the non-cash impact of $244 million ($1,020 per ounce) of the preliminary purchase price allocation ascribed to inventory. It also includes $74 million ($155 per ounce) related to how the streaming arrangement with Royal Gold A.G., a wholly-owned subsidiary of Royal Gold, Inc. ("Royal Gold") is reported under U.S. GAAP.
